E-Phone
Product Sheet

Description

Engineered to be a robust, completely wireless solution, the E-Phone is ideal for enhancing public security by providing clear voice-to-voice communication over a cellular network.
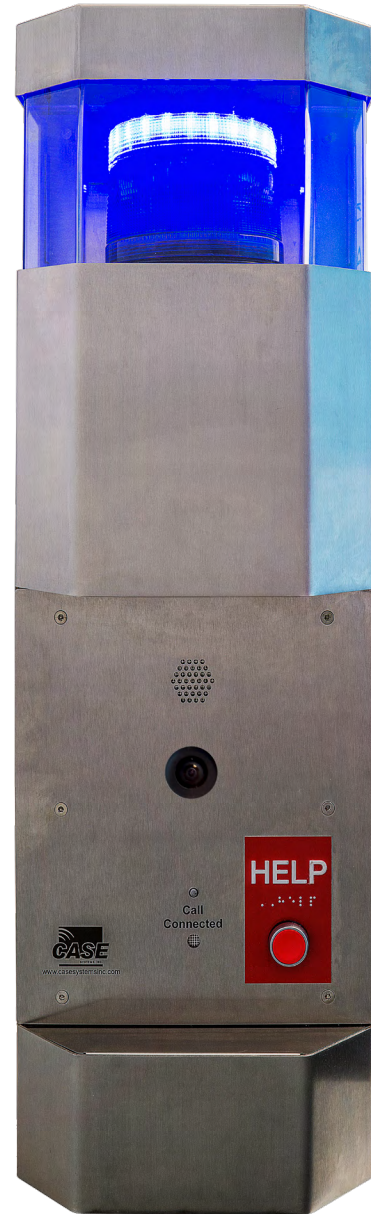

Popular applications include: parking lots and garages, airports, transit stations and college campuses.

Key Features

› Available in AC or Solar with battery back-up to provide uninterrupted power.

› Verizon® and AT&T® networked certified voice module

› Full Duplex Wireless Calling

› Weather-proof, tamper-proof steel housing protects the system's electronics insuring reliability and safety to the caller when needed

› Highly visible blue LED light positioned near the top of the unit and faceplate illuminates for the duration of the call and a minimum of two minutes after the call has been completed to alert responders

› Call location identifier

› ADA-compliant

› Includes CASE's exclusive, self-diagnostic, alarm monitoring system firmware called Liftkeeper®. The program provides system owners daily email reports on the operational status of their system.

Additional Features

› Faceplate Camera

Dimensions

Height:	31.5"
Width:	10.5"
Depth:	8"
Weight:	50lbs with battery

Battery (Standard)

Voltage:	12 V
Capacity:	17 Ah
Weight:	14 lbs

Solar Panel (Standard)

Power (Peak):	20.0 W
Voltage (Peak):	16.5 V
Current (Peak):	1.22 Amps
Weight:	13.0 lbs

AC

Voltage:	110 V or 120 V
